

Alex Mercer

San Francisco, CA | alex.mercer@example.com | (415) 555-0192 | linkedin.com/in/alex-merc-er-tpm | github.com/alex-merc-er

PROFESSIONAL SUMMARY

Results-driven Senior Technical Program Manager with 5+ years of experience leading cross-functional engineering teams, orchestrating agile workflows, and scaling high-throughput distributed systems. Experienced in integrating agentic AI workflows into sprint backlog triage, CI/CD observability, and release governance.

EXPERIENCE

Senior Technical Program Manager | Datasync Cloud Systems

Jan 2023 - Present | San Francisco, CA

- Orchestrated a 15-initiative platform engineering roadmap across 4 distributed engineering squads, delivering tier-1 cloud infrastructure milestones on schedule.
- Directed sprint planning, milestone tracking, and cross-functional dependency management for high-availability distributed microservices.
- Reduced customer-reported onboarding bugs by 31% using Claude Code to automate defect triage from Kubernetes crash logs.
- Streamlined sprint planning overhead from 4 hours to 45 minutes weekly by implementing automated AI backlog prioritization workflows.
- Facilitated daily standup cadences, pre-mortem risk audits, and executive milestone reviews across engineering, security, and product ops.

Technical Project Manager | Apex Software Labs

Jun 2021 - Dec 2022 | Seattle, WA

- Accelerated release cycle turnaround from 14 days to 4 days across 12 core microservices by instituting automated CI/CD gating.
- Spearheaded cross-functional alignment between backend engineering, site reliability, and executive stakeholders.
- Automated API regression test monitoring and incident escalation, reducing critical defect escapes into production by 42%.
- Optimized Jira sprint workflows and ticketing handoffs, cutting backlog triage cycle time by 35%.

KEY PROJECTS

- Agentic Jira Triager:** Engineered an open-source autonomous agent using Python and Gemini API to tag, prioritize, and assign Jira backlog tickets. github.com/alex-merc-er/jira-triager
- Release-Ops Automation Suite:** Built local CLI tooling automating sprint contract audits, rollback risk pre-mortems, and release notes synthesis.

SKILLS

- Methodologies:** Agile, Scrum, Kanban, Sprint Planning, Pre-Mortem Risk Audits, Dependency Mapping
- AI & Automation:** Claude Code, Gemini API, Python, LLM Orchestration, Prompt Engineering, CI/CD Automation
- Tools:** Jira, Confluence, Linear, GitHub Actions, Kubernetes, Docker, Datadog, AWS, Notion

EDUCATION

- B.S. in Computer Science** | University of California, Berkeley (2021)
